**Home Modifications and Assistive Technology for
Individuals with Disabilities**

FY2003 Request: \$200,000
Reference No: 33945

This request would provide funding for home modifications for individuals with disabilities. As the department continues to provide services to the most severely disabled individuals, the need for home modifications increases. Without the necessary home modification, an individual cannot take care of personal needs in order to go to work. An example of an appropriate home modification would be the installation of a lift-track system for an individual who experiences quadriplegia to allow him to lift himself from bed and into a chair without assistance. The track system allows the individual to perform personal hygiene care and dressing without assistance. This particular individual's goal is employment as a civil engineer.
